Notice-Notifier

This is a chrome extension which extract data from a website and display the data along with url link in the chrome extension.

The Tools used in making the project are :-

- **HTML**
  - ★ HTML language is used for describing the structure of chrome extension page.

- **CSS**
  - ★ CSS (Cascading Style Sheets) is used to style and layout **chrome extension page.**

- **BOOTSTRAP**
  - ★ Bootstrap which is a CSS Framework is used for developing responsiveness of the extension.

- **NODE JS(PUPPETEER).**
  - ★ Node (or more formally Node. js) is an open-source, cross-platform runtime environment that allows developers to create all kinds of server-side tools and applications in JavaScript.

  - ★ Puppeteer is a Node library which provides a high-level API to control headless Chrome or Chromium over the DevTools Protocol(Specially in Web scraping, web harvesting, or web data extraction).

  - ★ There are many different things you can do with the puppeteer library Like :
    - Taking a screenshot
    - Scrape multiple pages
    - Submitting a form
